SETS SPAN

☐ = Kid 1

• value = MSRP (faint) / market (bold). Bold black = real comp, amber = estimate.

How to use this. Each column holds two boxes — **left = Kid 1** (teal), **right = Kid 2** (magenta). Tick as you buy. Values read **MSRP / market**: the faint number is what it *should* cost, the bold one is what it *actually* costs right now — buy on the bold number. • **Prerelease boxes only exist from Wilds Unknown (Set 12, Q2 2026) on** (\$39.99 MSRP). Sets 1–11 had prerelease *events* but no retail box, so those cells are dashed. • **Collector Boosters are brand new to Lorcana.** Ravensburger has confirmed them starting with **Into the Inkdark** (Set 15, Q1 2027) — a listing briefly appeared then was pulled, so contents and price aren't public yet. Sets 1–14 never had one, hence the dashes; the column is here so it fills in as more sets get them. • **Market runs far above MSRP.** Recent sets list ~\$144 but trade \$200–270; **Fabled** is the extreme at ~\$1,200 against a \$144 MSRP. Bold black = a real comp (First Chapter, Fabled, Whispers, Winterspell, Wilds Unknown); amber = estimate. Three are flagged **UNVERIFIED** (Shimmering Skies, Azurite Sea, Reign of Jafar) — spot-check before buying. • Prices move fast, so confirm the live eBay number at purchase. Boxes = 24 packs.
