How to use this. Each set lists the booster *types* it was sold in; each type has **two checkboxes** — tick one per pack as you acquire your two copies. The # column is that set's pack total. Wrapper-art variants are ignored here — any art counts; getting extra arts is a bonus. • **Types:** DRAFT/PLAY = the set's main draftable pack (classic Booster → Draft → Play → UB Beyond); SET = Set Booster (only ~2020–2023, ended at Murders at Karlov Manor); COLL = Collector Booster (Throne of Eldraine 2019 on, plus the Ravnica Allegiance experimental run and Collector-only UB sets Doctor Who & Fallout). • **Excluded:** Theme Boosters, Jumpstart / Welcome / starter packs, prerelease packs, and non-random products (Secret Lair, From the Vault). • **2027:** six more sets confirmed, unnamed.

Compiled June 2026 • 482 packs (2 per booster type) across ~175 sets/products • MTG is © Wizards of the Coast. Unofficial fan reference.
